

Cherished Memories by Deborah Photography and Retouching

Description:

Photography has always been a way to remember good times like weddings, sweet sixteen parties, graduations and the birth of a new baby. We at Cherished Memories want to help you preserve your memories forever in a unique way. Remember the days of tattered edges, yellowing photos or how about those old Polaroids where the picture is basically not there anymore ?

Ever wanted to show off some of those old photos to family or friends but were too embarrassed to bring out the old photo albums? Why not try a new approach in photo enhancement and breath life back into pictures that may be tattered or worn....yellowed or so light you cant see them anymore. We lovingly place those photos or videos on a DVD that is set to music and makes a wonderful gift.
